

IGNITE ROBOTICS

Sponsorship Packet

2022-2023

ABOUT US

Ignite Robotics, a 501(c)3 nonprofit, operates two distinct but similar programs, both extremely competitive, designed to create the best environment to develop the skills, knowledge, and tools needed to succeed in an increasingly STEM-centered world.

Exothermic Robotics is our High-School level program, aimed at fostering the most dedicated and independently driven students. Exothermic students and teams have a long 16 year history of mentorship and collaboration in the path toward creating success.

Blaze Robotics is our Middle-School level program that focuses on creating the building blocks for long-term success in VEX and in STEM. We aim to give as much independence to Blaze students as possible, for their age, to create an environment where they too are responsible for their own success. Blaze students receive mentorship and guidance from adult coaches, as well as older Exothermic students.

WHAT WE DO

We aim to provide any and all resources needed for every Ignite student to succeed at the VEX Robotics Competition.

- Parts
- Materials
- Tools
- Competition Fees and more

We operate two locations on the Eastside Seattle Area, totalling ~4500 sqft to allow our students to work around the clock.

We also host 3-4 large tournaments each season, open to all Washington VEX Teams. Reaching hundreds of participants, parents, and professionals.

\$20,000+

-Company logo placed on sponsorship page

-Large company logo placed on website homepage

-Company Logo placed on team shirts

-Competition fields named after company

-Company logos placed on teams' robots and on World Competition banners

-Competition named after donor

IMPACT

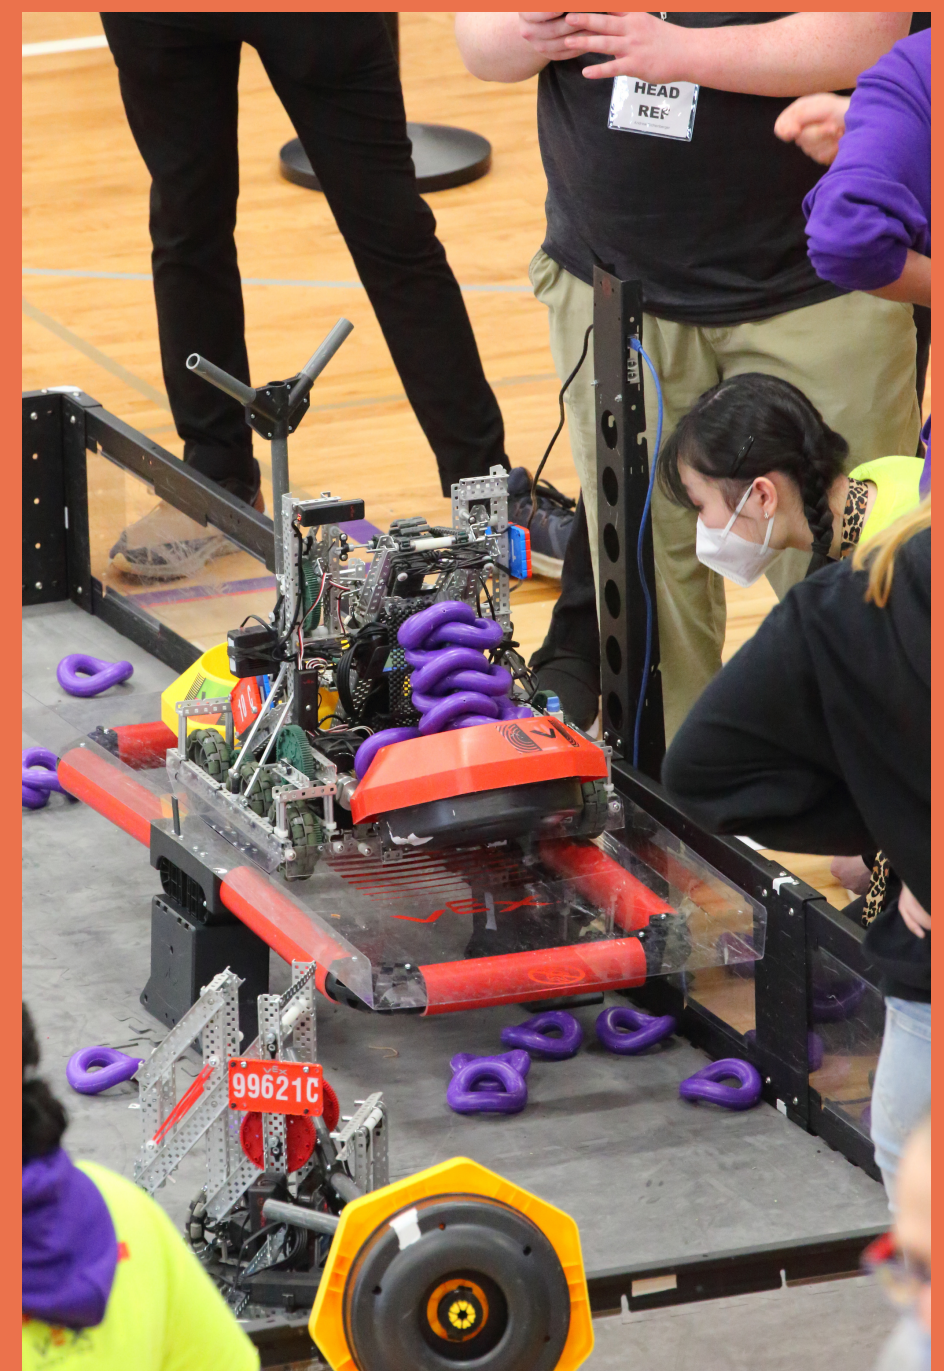

Ignite believes that self-driven, self-motivated, and passionate students create a culture and environment that promotes growth, development, and leadership. Your contribution helps us reach our goals:

Ignite comes at a cost to operate, with each student paying \$1250.00, on average, per season. We aim to lower this amount.

We can provide scholarships for students in underserved communities so they can participate in robotics.

We can expand the reach of Ignite beyond Bellevue, Redmond, and Kirkland

Ignite can continue provide the latest cutting-edge tools and materials for our students to push the boundaries of engineering

THANK YOU FOR YOUR CONSIDERATION
